In class. Lat. the word means 'something which strengthens or supports' (cf. 3). In the Vulgate it was adopted, in imitation of the στερέωμα of LXX (properly 'firm or solid structure', f. στερεοῦν to make firm or solid, f. στερεός firm, solid), as the rendering of Heb רָקִיעַ *rāqîaʿ*, applied to the vault of the sky. The Heb. word prob. means 'expanse', from the root רָקַע *rāqaʿ* which in the Bible has the senses 'to tread', 'to beat out (metals)', 'to spread out', but in Syriac the vb. means 'to condense, make firm or solid', whence the Gr. and Lat. renderings of the sb.]

A *adj* That is before all others; earliest in time or serial order, foremost in position, rank, or importance Hence often serving the function of a numeral adjective, the ordinal of One, in which use it may be written 1st.

In Eng, as in most other langs, the number *one* has no regularly formed ordinal, and in OE the want was supplied by the use of various superlative adjs meaning 'foremost' or 'earliest', viz *forma, fyrmest* (also *foremest*, Northumbrian *fordmest*) and *æresť*. In middle English the other words became obsolete, or lost their ordinal sense, so that *first* became the sole representative of the ordinal *one*. This is now the most prominent one, and colours all the applications of the etymological sense, but the word can still be applied (like L. *primus*, F *premier*, etc) in contexts where a true ordinal would be inadmissible, as in 'the first day of the year', 'one of the first men in the country', etc.

Fit (fit), *v*.[1] Forms **5** fitte, **7** fitt, fyt(t, 6– fit [Sense 1, found only in the *Morte Arthur* c 1400, is of uncertain etymology, but may possibly be f FIT *sb*.[1] Apart from this use, the word first appears late in 16th c. when it was presumably a new formation on FIT *a*. The coincidence of form and meaning with the 16–17th c Du and Flemish *vitten* to suit, agree, adapt, is remarkable, but most probably the two words have developed their identical sense independently by different processes, though they may be from the same ultimate root

In mod editions of 15th c works, the words *sit, sitt* (=to be becoming), *sitting* (=becoming) are often misprinted *fit, fett, fitting*, the latter do not appear to be older than the Elizabethan period, but when once introduced they rapidly superseded the older synonyms, probably owing to their obvious connexion with FIT *a*, they were felt to express the meaning more forcibly]

The conjecture that the game may originally have been played by five persons on each side appears to be unsupported by evidence , the 16th c. game of Hord and Cord (see quot. a. v.) is stated to have been on one occasion played 'five against five', but the two games had apparently nothing in common except that they were games of ball played with the hands The slang use of *fives* for the hand (see Five II 3 b) has not been found until long after the appearance of the name of the game, otherwise it would afford a plausible explanation of *Fr jeu de paume*, which originally denoted hand-tennis, though afterwards translated from the later tennis played with rackets The statement common in Dicts., that the name was given 'because three fives, or fifteen, are counted to the game', is unsatisfactory the number of 'points' in the Eton game is 15, but they are not divided into groups of five, and in other varieties there are 11, 20, or 25 points.]

Flake (flēk), *sb*² Forms : 6–8 **fleak**(e, 9 *dial.* **fleak,** *Sc* **fleik,** 4– **flake** [Of difficult etymology, possibly several distinct words have coalesced, though ultimate derivation from the Aryan root *plāg-* (cf Gr. πλήγνυναι to beat), parallel and synonymous with *plāk-* (cf. Lth *plaktì* I beat) may plausibly account for all the senses, and also for the fact that most of these resemble senses belonging to Flaw or Flaught, or to related words in other Teut. langs (f Aryan root *plak*). Sense 1 has not been found earlier than Chaucer, though Junius cites an O. **flacca* 7 *flæðra*, flaws or flakes of snow'; it appears to be cognate with ON. *flake* flock of wool, lock of hair, and perh. with OHG *flocco* of same meaning (if this be genuinely a Tent word, repr a pre-Teut **plegnēn-*, and not an adoption of L *floccus*) ; the OE *flacor*, fluttering, has also been compared. The Da. *flage*, *sneflage*, usually cited as equivalent to E. *flake*, perh corresponds rather to Flaw (Da *g* representing ON *g* as well as ON *ð*) , the *Danisk Ordbog* 1800 explains it as a *large* mass of falling snow, as opposed to *flok* which means a ' flake ' in the Eng. sense. The senses expressing the notion of ' something pecled or split off ' may be compared with Flay *v.* (OText **flah-*...OAryan **plak-*) There is possibly a third primary sense, ' something flat ', cf. OHG *flah* adj (mod Ger. *flach*), Du. *vlak* flat, Sw. *flaka* plate, Norw. *flak* ice-floe But the mutual relation of the Eng senses is very uncertain]

Welsh *guulan* wool (=Ir *olann*:—OCeltic **ulanā*:—older **wolanā*). This is plausible, but involves some difficulties the Welsh word is not originally a name for the material, but (as is indicated by its formation with the individualizing suffix *-en*) means literally an article or piece of material made of wool, and the assumed change of *flannen* into *flannel* is perh less explicable than would be the contrary change, which might be ascribed to the analogy of *linen*, *woollen*. Another suggestion is that the word is an AF. diminutive of OF *flaine* blanket or coverlet]

Flask (flask), *sb.*[2] Forms. 1 flasce, flaxe, 6–7 flaske, 7 flasque, 6– flask [A word found in nearly all the Teut. and Rom. langs.; whether adopted from late L. into Teut., or conversely, is undetermined. The earliest known examples are in Latin; three different declensional forms appear

in med L , and all of them are represented in the Rom. langs (1) In Gregory's *Dialogues* c600 (II xviii , cf I. ix) the form *flasci*, *flasconem* (whence It. *fiasone*, F *flacon* see FLAGON) denotes a wooden vessel, apparently a small keg intended to be carried by pedestrians and to contain a supply of wine to be consumed on a journey , it is there stated to be a word belonging to the vulgar speech. In later use the word appears as a synonym of *buttucula*, BOTTLE, and applied to a vessel either of wood, leather, metal, earthenware or glass The Greek transl. of Gregory's *Dialogues*, believed to be of the 8th c., has φλασκίον, which is frequent in Byzantine writers of the 10th c (2) In the 7th c Isidore (*Etym* XX vi. § 2) gives the form *flasca*, which he regards as a derivative of Gr φιάλη, stating that *flasce* were originally made for carrying and storing *phialæ* (? shallow drinking cups), though afterwards used to contain wine , the form survives in It *fiasca*, OF *flache*, *flasche*, *flaske*, *flasque* (the last of these survived till 16th c , and in the sense 'powder flask' to a later period) (3) The form *flaxida* is given in Du (Lange, but is prob only a latinized form of It. *fiasco*, which may represent med L *flasco* nom) , equivalent forms are Sp *flasco*, *frasco*, Pg *frasco* .

The word occurs in all the Teut langs exc Goth , and always as wk fem OE *flasce*, more usually *flaxe*, OHG *flasca* (MHG *vlasche*, also *vlesche* with the vowel change normal in some dialects before *sch* ; mod Ger *flasche*), MDu *flasche*, *flessche* (mod Du *fles(k)*), ON *flaska* is doubtful, as it has only been found in the nicknames *flaskahegg*, *flaska-barda*, explained by Vigf as 'bottle-beard', 'bottle-back', Icel , Sw *flaska*, Da *flaske* may be from Ger In the mod continental Teut langs it is the ordinary word for bottle , in OHG. it had the same wider sense as in OE (see 1 below)

The OE word, which would normally have become **flash* in mod E , appears not to have survived into ME. In 16th c the F *flasque* was adopted in the sense powder-flask (the wider sense being then already antiquated in Fr) The older Fr sense, a bottle, first appears in Fng about 1700 , whence it was adopted is not clear, but as this word is chiefly associated with Italian wine and oil, it may most naturally be regarded as from the It *fiasco*, the etymological identity of which with the already existing Fng word would be readily perceived

Scholars who regard the word as of Rom origin usually accept the view of Diez, that *flasco* is for **frasco*, a meta thesis of **trasco*, from L *vasculum* This is satisfactory with regard to meaning (as Gregory describes as *vas ita figuræ* what he says were vulgarly called *flascones*), and involves no insuperable difficulty with regard to form, though the phonetic process supposed has no precise parallel in any known instance, for approximately similar phenomena, such as *Baba* from *Babula*, see Diez The early occurrence of the types *flascam*, *flasconem*, and the absence of the type *frascone* in early use, are somewhat unfavourable to this hypothesis The assumption that the word is of Teut origin is chronologically legitimate, and presents no difficulty exc the absence of any satisfactory etymology A connexion with Flat *a* would be phonetically probable, but there is no evidence that the sb originally meant a flat vessel From Teut the word has been adopted into many other langs *Flaske*, *laske*, Hung *palaczk*, Polish *flasza*, Czech *flaše*]

In sense it represents OF *flater-r* (mod F. *flatter*), = Pr. *flatar*, the primary meaning of this word is believed to be 'to flatten down, smooth', hence 'to stroke with the hand, caress' (a sense still current in Fr); this sense, as well as that of OF. *flater, -ir* to dash to the ground, is plausibly accounted for by derivation from the Teut word which we have as FLAT *a* The normal form which *flat v* should assume when adapted into E is the rare Sc FLAT *v*. More probably, however, the native FLATTER *v*.2, an onomatopœia expressive of light repeated movement, may have developed a sense resembling the primary sense of the Fr. word, and hence have been accepted as its equivalent Cf. Flee (fī), *v* Pa. and pa. pple. **fled** (fled) Forms see below [A Com. Teut. originally str vb OF *flēon* (*flēah*, *flugon*, *flogen*) > OFris *flīa*, OS *flohan* (MDu *vlīen*, pa. t *vlōh*, later MDu and mod Du *vlieden*, pa. t *vlood*, pa. pple *vlooden*), OHG *flohan* (MHG *vlehen*, mod Ger *fliehen*, ON *flýja*, *flýja* (with -*ð*- suffix in pres. stem), str pa. t *flð*, *flugom*, more commonly inflected weak, pa. t *flýða*, pa. pple *flýðr* (Sw *fly*, pa. t *flydde*, Da. *flye*, pa. t *flyede*), Goth *flūhan* > O Fris **flēnhan* (inflected weak **flāde*, **flugum*, **flogono-*). The root (pre-Teut **fleuk-*) has not been found outside Teut. As the original initial *þ* has become *f* in all the Teut. langs. exc. Gothic, those forms of the vb which according to Verner's law change *h* into *g* came to coincide with the corresponding forms of **fleugan* to Fly; hence in all these langs the two vbs have been more or less confused together

In OE the vb was, so far as is known, always strong. The str. pa. t. and pa. pple. survived in occasional use down to the 15th c., but in the 13th c. the weak pa. t. *flædde*, pa. pple. *flæded* began to be used, and soon became more common than the earlier forms. Their origin is obscure: normally, they would imply an inf. *flēdan*, and one instance of *flēde* inf., with the sense 'to flee', has been found in 13th c.; but little stress can be laid on this, on account of the late date, and the possibility that the form may have been invented by the writer for the sake of rime, on the analogy of the pa. t. *flædde* (for which Caxton has *flēdeth*). Identification with Fleer to flow or flood seems impossible on account of the difference in sense. Some have compared *flēde* with the Du. form *vliēden*, but the Du. practice of inserting a euphonic *d* in vbs. with roots ending in *h* (as in *belijden*, *wijden*, *vliegen*) is peculiar to that lang. (first appearing in late MDu.), and has no parallel in Eng., further, the Du. vb. in spite of its alteration in form, is still conjugated strong., hence it seems probable that the resemblance between the Du. and Eng. forms is purely accidental. The resemblance of Mn. *flidde* to Sw. *flydde* may possibly be more significant In MSw. those vbs. which, in consequence of contraction, had their present stems ending in a long vowel, formed their past tense in *dde* for the earlier *þ*, the change, according to Noreen, dates, so far as the spelling is concerned, from about 1350; it may however have occurred much earlier in some East Scandinavian dialect. The supposition that ME *flodde* may be of Scandinavian origin is supported by the fact that the earliest examples are chiefly from writers whose dialect is strongly marked by Scandinavian influence, on the other hand, it occurs as early as 1340 in the Kentish dialect of the Ayenbite

The confusion between the vbs. *flee* and *fly* occurs already in OE. In northern dialects the form *flee* in the normal phonetic descendant both of OE. *flēon* to flee and of *flēogan* to fly. In mod. Eng. the association of the two vbs. has the curious result that the ordinary prose equivalent of L. *fugere* is Fly and pa. pple *fled* (the forms, however, *flown* have only the sense of L. *volare*), while *flee* has become an hair, being confined to more or less rhetorical or poetic diction. Even *fled*, indeed, now belongs rather to literary than to colloquial English: expressions like 'run away' being substituted in familiar speech]

6. Occasionally used for FLY (= *volare*) (Often in Shelley)

Examples of the present stem from dialect literature (S. and northern Eng.) are not given here, as in them *flee* is the regular form of FLY. In the present instance the use of *flee* for *fly* is chiefly for the sake of rime, or to produce a sort of archaistic effect, in older writers it may be due variously to confusion between the two verbs, to adoption of dialectal phrases (esp. in 'to let flee'), or to a development from sense 5

No satisfactory cognates have been discovered either in Lat or in the related langs Some have supposed that the special Scandinavian sense, which exists in some Eng dialects where ON influence is out of the question (see, e.g., the *West Cornwall Glossary*), is the original meaning of the word, and that the occasional OE form *flæsc* represents the primary word elsewhere replaced by a derivative with suffix *-sk* On this hypothesis the word might be related to OE *flæsc*, FLETCH But general analogy rather indicates the priority of the weaker sense found in Eng and German, and it is most likely that the OE *flæ̂sc* is an inaccurate spelling, or at most a dialectal phonetic alteration, of the normal *flæsc* where shortening of the OE long vowel before r followed by another cons is normal]

Flue (flū), *sb*.³ [Of unknown origin.]

The exact primary sense is uncertain, assuming that it meant 'channel, passage', some have compared early mod. Du *vloegh* flutings of a column (Kilian), and others would connect it with FLOW or FLOAT. It is possible that the primary reference may be to the *flung* (see FLUE(R) *sb*.²) of the sides of the chimney in houses of the 16th c. This view derives some support from sense 3.
